This operating system has a very chicory range of different features.Most of the basic tools are from GNU projects; they are the placeholders of the operating system.

Introduction to Linux Operating System - GeeksforGeeks

Linux has long been on the "wishlist" for control systems. Until now, most systems have been locked-in to the Windows operating system due to reliance on classic OPC—a ubiquitous communication standard based on Microsoft's Distributed Component Object Model (DCOM). The name of the game is changing, however, with the arrival of the next-generation OPC standard, the OPC Unified ...

3 Reasons Linux Is Preferred for Control Systems

Linux is a community of open-source Unix like operating systems that are based on the Linux Kernel. It was initially released by Linus Torvalds on September 17, 1991.
