### **10 Solutions for Climate Change - Scientific American**

A solution is made when one substance called the solute "dissolves" into another substance called the solvent. Dissolving is when the solute breaks up from a larger crystal of molecules into much smaller groups or individual molecules. This break up is caused by coming into contact with the solvent.

### **What is a Solution in Science? - Definition & Examples ...**

A solution in science is a homogeneous mixture made up of two or more components, and can be a solid, liquid or gas. Common solutions include steel, air and salt water. What Makes Up a Solution in Biology For consideration as a solution, a mixture must have at

least two components and be homogeneous.
